

ARCHITECTURAL COMPONENTS

Deepdale Engineering specialise in the production of decorative and functional features for building projects ranging from Airports to Shopping malls.

Typical materials used are mild and stainless steels, aluminium, brass and other decorative metals for use indoors or as exterior components.

We are happy to supply one off sections or batch orders on time and to the customers exacting specifications.

TYPICAL PRODUCTS:

- Aluminium cladding sections
- Rolling & Forming column cladding
- Gutters
- Angles
- Channels
- Interlocking sections
- Special shapes and sections

Whatever your individual needs, we are sure that, by speaking to Deepdale's team of experienced engineers, a solution to your problem is just a phone call away.
